Monitoring Swiss Energy Strategy 2050

On December 20th, the Swiss Federal Office of Energy (SFOE) released its first progress report on the implementation of the national Energy Strategy 2050. The report shows the situation at the end of 2017 and considers the interventions that have been taken. It describes the progress made towards the 2050 targets and the steps taken in implementation. The monitoring report was produced by the SFOE under the coordination of the SCCER-FURIES,

The detailed monitoring report contains around 40 indicators in seven thematic areas:
- Green renewable energy
- Blue renewable energy
- Energy products
- Energy-related CO2 emissions
- Energy production and grid development
- Energy security
- Spending

The annual public funding for energy research is doubled from CHF200M to CHF400M, mainly through large funding programs such as Innosuisse SCCERs, SNSF PNR 70 and 71, and SFOE projects. The pre-proposal submission deadline for the 2019 call is 15 January 2019. A full report in German is available on the SFOE web page, and a shorter version (FR, DE) is available in English.

The underground cabling, mainly reserved for the transmission grid, has reached the 17.01.2019. The report on the achievements of the national Energy Strategy 2050.
