Overcoming barriers

The InnovaSE program aims to achieve its goals by 2025. The latest update on environmental research and validation activities is available on the Swiss Energy Research Program website. For more information, please visit the program's website. The national funding agencies are prioritizing the following programs that can support such efforts, thus ensuring a smooth transition to a more sustainable energy system.

Therefore, appropriate dissemination activities should be in place to support the dissemination of the program's results. This can be achieved through various channels, including scientific conferences, workshops, and seminars. These activities will play a crucial role in ensuring the success of the program.

SCCER-FURIES invites its partners to a special event, the SCCER-FURIES Management Office, in Sorrento 2020. The proceedings of the event will be available on IEEE Xplore. The SCCER-FURIES activity report will be available soon.

The academic community seconds this group by providing scientific evidences on the relevance of these barriers' impact on the implementation of mainly demand side innovative solutions. For the latter category, another White paper will be available soon.

For the former category, it has been established with the aim to provide policy recommendations for the implementation partners and policy makers. While the national funding agencies are preparing the following-up programmes that can support such efforts, thus ensuring a smooth transition to a more sustainable energy system, such efforts should be even intensified. For the former category, it has been established with the aim to provide policy recommendations for the implementation partners and policy makers.
